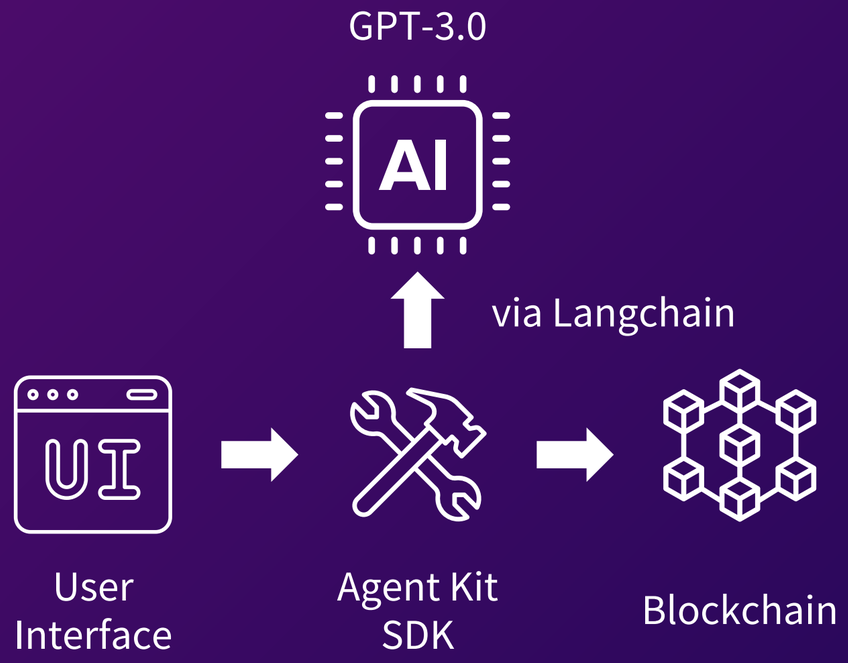
STORY.BUILD

AI MCP TOOLKIT FOR **IP** LIFECYCLE & APP CREATION ON STORY PROTOCOL

Surreal World Assets Buildathon’25

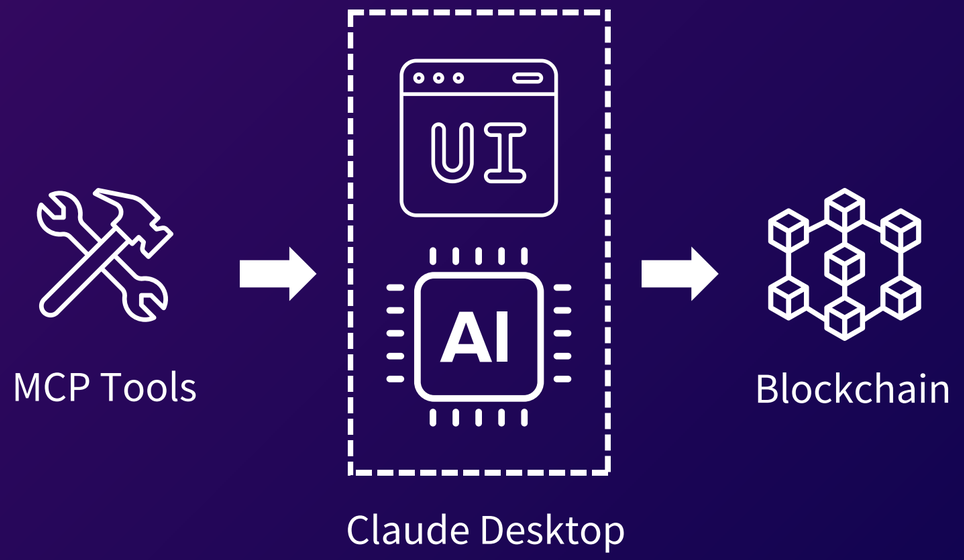
TRADITIONAL CRYPTO AI APPLICATIONS



- Tightly coupled to specific AI models
- Need to build custom chat UIs & features
- Short lifespan ~4-6 months

MODEL CONTEXT PROTOCOL (MCP)

Introduced by Claude AI in late 2024



- Tools work inside official AI chats
- Users choose any model version
- Devs focus on logic, not UI

INTRODUCING STORY.BUILD

A full-functional MCP toolkit that lets handle IP registration, license creation, purchase flows, and full web app generation

During the hackathon, we built 17+ tools covering wallet operations, IP flow, and app generation, all ready to use via a familiar chat interface like Claude or Cursor.ai

SCOPE OF WORK
